MASTERS

KENYA SEASON  
THREE

The Safari Rally Kenya, as it stands in 1994, remains the most grueling and unforgiving event in the World Rally Championship - a true endurance trial where survival matters more than outright speed.

Stretching across vast distances of Kenya's unforgiving terrain, the rally takes crews through rough gravel tracks, deep mud, broken rocky roads, and unpredictable river crossings.

The African climate adds another layer of brutality, with searing heat, sudden rainstorms, and choking dust all capable of destroying cars and crushing hopes in an instant.

Unlike the shorter, stage-based rallies of Europe, the Safari is defined by its immense length and relentless punishment of machinery, where reliability, preparation, and mechanical sympathy are paramount.

Between 1987 and 1993, it has become a battleground dominated by resilience and discipline, where only the toughest drivers and strongest machines reach the finish.

As the 1994 rally begins, the Safari continues to stand apart - not just as a rally, but as the ultimate test of endurance in world motorsport.
